

# Annual Pesticide Notification

Cupertino Union School District  
Grounds Department  
**Annual Pesticide Notification**  
2020 – 2021

Assembly Bill 2260 (Healthy School Act of 2000) requires school districts to notify all parents and staff annually of the names of all pesticides and herbicides that are planned for use during the school year at all school sites. Cupertino Union School District has established an integrated pest management approach, which means the District uses the least toxic method first and then will work up to stronger chemicals only if needed.

The following pesticides have been identified for possible use during the 2020–2021 school year. Only staff or contractors who have received appropriate application and safety training use these products. Applications will occur during school vacations and staff learning days.

## SCHOOL FIELDS & AGRICULTURAL AREAS

| <b>Product/Manufacturer</b>           | <b>EPA Registration</b> | <b>Primary Ingredient</b>  |
|---------------------------------------|-------------------------|--|
